

INTERNATIONAL COLLABORATION RESEARCH: COMPARATIVE STUDY ON TVET CURRICULUM IN INDONESIA AND BRAZIL

by Mochamad Bruri Triyono

ABSTRACT

This is a comparative study in collaboration with YOGYAKARTA STATE UNIVERSITY and the FEDERAL UNIVERSITY OF RIO DE JANEIRO. This research project addresses the following issues curricula designed in Brazil and Indonesia, and the curriculum frameworks cover the work areas according to regulations. Furthermore, the main goal of this project is to analyse the graduation programs curricula under the National Professional Regulations and the national and international job markets. We want to suggest curricular structures that are broad, modern, and flexible, allowing for the country's and the professionals' development in all work areas and for the internationalization of these professionals. In designing the curriculum, two countries need to make decisions about the breadth and depth of the content and approaches. There, the output is that students can take common subjects with distinctive local features. The course can be taken through online and/or offline study modes. And it is possible to transfer credit from or to both Universities through a joint curriculum. There will be publication under Scopus-indexed journals from this study.
