# ANALISIS TREND PENELITIAN UNY BERBASIS OUTPUT DAN OUTCOME TAHUN 2017 - 2021

## by Erwin Setyo Kriswanto

## ABSTRACT

College rankings are determined by the strength possessed by universities in producing research in the aspect of output and outcome. Objective this research is: 1) Describes the trend of output-based UNY research performance and oucome 2017-2021; 2) Formulate effective strategies to improve research based on the output and outcome of UNY research from the aspect of output and outcome 2017-2021.

The study uses a "mix-method" approach on the grounds that by the use of these two approaches will provide comprehensive data on trend of UNY research data. Quantitative data will be analyzed from secondary data that will describe the research profile of UNY from the aspect of output and outcome. As for the data Qualitative data were collected from interviews, and FGDs were used to uncover factors supporters and obstacles faced by UNY in implementing policies output and outcome-based research. Data analysis using statistical calculations, and qualitative analysis using the principles developed by Crasswell about the importance of categorizing, interpreting and interpreting the main findings. Outside mandatory is the article submitted in 2021 to the accredited journal, and in 2022 the article already accepted. Additional outputs are in the form of published monographs, and paten.

Kata Kunci: *performance, output, outcome*
