

IMPLEMENTATION OF INDEPENDENT CAMPUS LEARNING CURRICULUM AT YOGYAKARTA STATE UNIVERSITY

by Prof. Dr. Aman, M.pd.

ABSTRACT

One of the goals of the state contained in the Preamble to the 1945 Constitution of the Republic of Indonesia is to educate the life of the nation. This effort continues to be carried out by the government by developing facilities and optimizing human resources through education. This is in line with the opinion of Ki Hadjar Dewantara (2016: 12) that education in this case is aimed at forming a complete human being in the context of fulfilling human existence in his life. This is the basis for the government to develop the potential of its citizens as a form of advancing the country. In article 1 paragraph 1-2 of the Law of the Republic of Indonesia No. 20 of 2003 regarding the National Education System, it is explained that the government is trying consciously and in a planned manner to realize a learning process for citizens to develop their potential based on Pancasila and the 1945 Constitution of the Republic of Indonesia. This effort is then aligned with national cultural values that are responsive to the demands of the times.

Kata Kunci: *curriculum, independent, independent campus*
