

TRAINING ON THE PREPARATION OF THE “QIZIZZ” ONLINE TEST FOR ELEMENTARY TEACHERS IN PURWOHARJO VILLAGE, KULON PROGO DISTRICT DURING THE COVID-19 PANDEMIC

by Edi Istiyono, Widiastuti, Risky Setiawan

ABSTRACT

Each program implementation always involves assessment and evaluation activities. The focus of the assessment of learning outcomes is the individual, while the focus of evaluating learning outcomes is the group or program. This understanding has implications for improvement programs, individuals or groups/institutions. Assessment of learning outcomes is an important thing and is the obligation of a teacher. The assessment process includes collecting evidence about students' learning achievements, where this evidence is not always obtained through tests alone but can also be collected through observation or self-report. Based on this background, the Postgraduate Program at Yogyakarta State University plans to have a fostered village, Purwoharjo village, Tinalah tourism village for SD/MI education: MI Muhammadiyah Sendangmulyo, MIN 3 Kulon Progo, Bangunrejo, Purwoharjo State Elementary School, Tukharjo State Elementary School. The UNY Postgraduate Program will hold training on online test instrument preparation with Quizizz for elementary school teachers in Kulon Progo. This is intended so that these elementary school teachers are able to increase their capacity in preparing online assessment instruments in the midst of the COVID-19 pandemic. It is for this reason that activities are planned to be carried out online using the Google Meet application which is already rather familiar and simple. Because using Google Meet can be accessed via mobile phones or PCs with various operating systems it can be accessed easily because it is website-based.

This service activity is very relevant to Permendikbud Number 66 of 2013 concerning Education Assessment Standards and UNY Strategic Plan Objectives (Renstra) for 2015-2019 number 3, namely the realization of community service and empowerment activities that encourage the development of human, community and natural potentials to realize community welfare. This training was able to provide additional knowledge and skills to teachers at SD Tukharjo and SD Purwoharjo in preparing HOTS questions and compiling online assessments based on Quizizz and Wordwall to assess student learning outcomes. In addition, these teachers gained additional knowledge related to the principles of assessment, preparation of grids, preparation of item items, and analysis of item items. On the other hand, students who are involved in this training can implement the knowledge they have acquired in college to help trainees in the practice of compiling questions online with an application that is interesting namely Quizizz and Wordwall.
