

THE SOCIALIZATION OF THE PICKLEBALL GAME FOR PHYSICAL EDUCATION SPORTS AND HEALTH TEACHERS IN THE SPECIAL REGION OF YOGYAKARTA

by Ahmad Rithaudin, dkk

ABSTRACT

Pickleball game is a form of game that uses the net as a separator for the two parties who play this game. Starting from a game activity carried out as a spare time filler, then this game developed into a sport with standard rules. As a relatively new sport known in Indonesia (approximately 5 years). This sport is still considered unknown to a wide audience, especially in the Special Region of Yogyakarta. Which, this sport was only known at the end of 2019. The problem of facilities and infrastructure is still an obstacle to the spread of this sport. Likewise with the Covid-19 Pandemic that hit the world from the beginning of 2020 until now. Although global conditions are increasingly showing recovery, other problems, namely limited access to the provision of facilities and infrastructure, are felt to be an obstacle to the spread of this sport. For this reason, the FIK UNY service team will raise the theme of socializing the pickleball game which will be delivered to the Physical Education and Health (PJOK) teachers. It is hoped that this sport will be increasingly recognized by the wider community, especially making PJOK learning activities in schools more varied.

Kata Kunci: *Pickleball, PJOK learning*
