ABSTRACT

This study aims to find out and analyse the variety of learning media used in thematic learning in lower grade of elementary schools. In addition, it also aims to describe the competence of teachers in the use of thematic learning media which includes the ability to design, develop and utilise thematic learning media in lower grade of elementary schools.

The choice of research method in this research is descriptive quantitative. The research data in the form of numbers is described to find out how the teacher's competence in utilising thematic learning media in elementary school. The instruments used were questionnaires, interviews and observations.

The results showed that the variety of learning media used in thematic learning included printed media, visual media, manipulative media, internet, realia and interactive multimedia. Based on this diversity, it shows that the teacher already has an awareness that they are not the only source in thematic learning activities. Teacher competency in the use of thematic learning media in the category is very good. This includes the ability to design media, produce media and use thematic learning media in learning activities in elementary schools.

Kata Kunci: *teachers' competence, the use of instructional media*
