ABSTRACT

The important role of tracking the performance of alumni of doctoral program graduates can be used as a benchmark in improving services and supporting the implementation of education. The purpose of this research is to reveal the extent to which the education program that has been implemented has succeeded in preparing its alumni to work and have a career in various types of relevant work. The approach used in this study is a quantitative and qualitative approach with a cross-sectional type of research, which was carried out using a survey method. The measurement of search results is targeted at graduates of the Educational Research and Evaluation Doctoral Program with random sampling technique and using a modified Google Form. The results of the study show that the distribution of alumni of the Educational Research and Evaluation Doctoral Program is spread from various educational and non-educational institutions with the need for an education level equivalent to the third strata, the level of need for soft skills and hard skills is high. This has been realized by the Doctoral Program for Educational Research and Evaluation through the provision of dissertation guidance facilities, writing articles used as graduation requirements, to administering courses that are in accordance with field needs. Therefore, the implementation of this Education program is considered successful in preparing its alumni for work and careers.
