### **ABSTRACT**

Football is a sport that has received an extraordinary response from the global community, including in Indonesia. However, the data shows that there are approximately 14,000 registered SSB spread across 34 provincial associations and only 7,000 licensed coaches. In the Province of the Special Region of Yogyakarta, 38 SSBs affiliated with ASPROV and 76 certified coaches train 3,800 aged soccer athletes. Early. Judging from this number, the need for licensed trainers is high, so concrete steps are needed for collaboration between Asprov and educational institutions to prepare qualified prospective trainers with licenses. The trainer training workshop activity for PKO students in soccer is one of the facilities provided by the service team to prepare them to be ready to take courses and be willing to train in the field; then, a questionnaire is conducted about the implementation of the activity. The results of this activity obtained responses through a questionnaire containing three assessment types: 89.5% assessment of the instructor's ability, 93.4% on the material presented, and 89.2% on the facilities and implementation carried out. Training activities must be carried out regularly and continuously; then, participants can continue attending the D license trainer training course.
