

EVALUATION STUDY ON THE IMPLEMENTATION OF THE MBKM CURRICULUM IN THE BIOLOGY DEPARTMENT

by Slamet Suyanto, Suratsih, Agung W. Subiyantoro

ABSTRACT

The aims of this research is to evaluate the MBKM program from independent curriculum. There are 8 programs of the MBKM that can be chosen by students, specifically biology education students.

This research administered survey method using google forms and internet to distribute the questionnaires. As many as 253 students from 5 higher education institutions participated in this research. The data analysis was descriptive statistics.

The results indicate that the students have already involved in the MBKM. The programs of MBKM that are chosen by the students were (1) KKN, (2) educational practice in school, and (3) students' exchange that totally reach 60%.

Kata Kunci: *MBKM, KKN, students exchange, school practice*
